Předmět: Re: Request for General Guidance on Forensic Testing Methods for Cannabis Flowers

Komu: Nikolay Lezhnev <lezhnev.nick@gmail.com>

Dear Mr. Lezhnev,

thank you for your email and for your interest in the forensic analysis of controlled substances.

ENFSI does not provide consultancy in that respect apart from formal guidelines which are publicly available. Our guidelines set out overarching principles for the analysis of controlled drugs, and it is up to individual countries to apply these in practice while taking into account their own legislation and strategies for the examination and control of cannabis.

For more detailed information on the best practices for testing cannabis, we would recommend the open-access methods published by the United Nations Office on Drugs and Crime (UNODC).

*Best regards,
Jessica Behnke*
